Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Alex is learning about Java's functional interfaces and lambda expressions.

He wants to write a simple program that prints the square of each number in an array using a predefined functional interface.

Help Alex complete this task using the Consumer functional interface.

Input Format

- The first line contains an integer N, the number of elements in the array.
- The second line contains N space-separated integers.

Output Format

- Print the squares of all elements in the array, separated by a space.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 4
1 2 3 4
Output: 1 4 9 16

Answer

```java
// You are using Java
import java.util.Scanner;
import java.util.function.Consumer;
class main{
    public static void main(String[] args){
        Scanner sc = new Scanner(System.in);
        int n=sc.nextInt();
        int arr[] = new int[n];
        for(int i=0;i<n;i++){
            arr[i]=sc.nextInt();

        }
        Consumer<Integer> obj=(x)->{
            System.out.print((x*x)+" ");
        };
        for(int i:arr){
            obj.accept(i);
        }

    }
}
```

Status : Correct   *Marks : 10/10*
